

The Champ playbook — ESS edition

What Champ can do for you in the employee self-service portal, who can use each part, and example chats you can copy. For every employee, team lead, HR admin and super admin.

- 01 Getting started
- 02 Who can use what
- 03 Your own leave and attendance
- 04 Your team and approvals
- 05 Counts, lists and reports
- 06 The audit trail
- 07 Changing settings and roles
- 08 Giving work to a teammate
- 09 The Requests tab
- 10 Champ inside Champ Chat
- 11 Limits, safety and tips

01 · GETTING STARTED

Opening Champ

Champ lives in Champ Chat. Open **Champ Chat** from the sidebar and pick 🌟 **Champ** at the top of the conversation list.

IN THE PANEL	WHAT IT DOES
Chat tab	Ask in plain English. Enter sends; Shift + Enter starts a new line, useful when pasting report headings.
Requests tab	Approvals and tasks waiting on you, tasks you handed out, and what was settled in the last 14 days.
Badge on 🌟 Champ	How many approvals and tasks are waiting on you. It updates when something changes.
Clear	Starts a fresh conversation. Champ remembers the last 12 messages of the current chat only.
@Champ in Champ Chat	Ask in any conversation. Everyone in it sees the answer, so Champ only answers public things there (see section 10).

The one rule to remember: Champ never changes anything on its own. When it prepares something — a leave request, an approval, a task, a settings or role change, a new login — you get a card with a button. Nothing happens until a person presses it, and the button runs the same checks as the portal page that does that job.

What each role can ask Champ

Champ only sees what your login is allowed to see. A tool your role can't use is simply not offered to Champ in your chat. Named roles such as IT Support add exactly the privileges a Super Admin gave them.

CAPABILITY	EMPLOYEE	TEAM LEAD	HR ADMIN	SUPER ADMIN
Your own balance, attendance, holidays, policy, manager and HR	✓	✓	✓	✓
Draft your own leave, correction or comp-off	✓	✓	✓	✓
Approve or reject from a card	—	own reports	as concerned HR	✓
Team status and leave for the next 14 days	—	own team	any team	any team
Give a task to a teammate	—	own team	anyone	anyone
Counts, lists and reports on the roster	—	—	✓	✓
Audit trail (who did what)	—	—	✓	✓
Draft reporting-line, concerned HR or shift changes	—	—	✓	✓
Draft an announcement for #announcements	—	—	✓	✓
Draft role changes, named roles and new logins	—	—	logins only	✓

Questions about your records everyone

Ask about your balances, requests, attendance, holidays for your shift, the leave policy, and who you report to. Every number comes from ESS; Champ does not estimate.

EXAMPLE · BALANCE

How much leave do I have?

You have 14.5 Earned Leave, 7 Sick Leave and 5 of 7 Casual Leave left for 2026.

EXAMPLE · HOLIDAYS FOR YOUR SHIFT

What is the next holiday?

Gandhi Jayanthi, Fri 2 Oct. After that: Dushhera on Wed 21 Oct and Diwali on Mon 9 Nov.

Names and numbers in these examples are illustrative.

EXAMPLE · A LEAVE REQUEST, DRAFTED

Apply for casual leave next Monday, family function

I have drafted a Casual Leave request for Mon 5 Oct (1 day). It goes to Rahul Menon, then HR. Nothing is sent until you press Submit.

LEAVE REQUEST · NOT SENT YET

Casual Leave · Mon 5 Oct 2026

Reason: "Family function"

Submit request

EXAMPLE · MARKED LATE, WITH A CORRECTION

Why was I marked late on 22 Sep?

Your first punch on 22 Sep was at 09:47, and your office timings are 9:00 AM to 6:00 PM. If the reader missed you, I can draft a correction.

ATTENDANCE CORRECTION · NOT SENT YET

Tue 22 Sep · in 09:05

Submit correction

EXAMPLE · WHO YOU REPORT TO

Who approves my leave?

You report to Chief, so your requests go straight to your concerned HR, Priya Nair, for a single approval.

04 · YOUR TEAM AND APPROVALS

Who is out, and what is waiting on you

team lead · HR

EXAMPLE · TEAM STATUS

Who is out in my team this week?

- Aditi Sharma: on leave until Fri 2 Oct
- Vikram Shetty: week off Wednesday
- Everyone: Gandhi Jayanthi on Friday

EXAMPLE · APPROVING FROM A CARD

Anything waiting on me?

One leave request is waiting on you.

LEAVE REQUEST · WAITING ON YOU

Anil Kumar · Casual Leave · Mon 12 Oct

Reason: "Family function"

Approve

Reject

Rejecting asks for a short reason, which the person sees. The same requests also arrive as cards in your ESS notices feed in Champ Chat.

Reports from your own headings

HR · super admin

Ask "how many" for counts and "who" for lists, or paste the column headings you need in any wording. Champ matches each heading to a portal field and builds the table from real records. You can download it as CSV. It tells you if a heading couldn't be matched.

EXAMPLE · A GAP IN THE DATA

Who has no concerned HR assigned?

38 active people have no concerned HR, so any HR admin picks up their requests. 29 are in Data Ops and 9 in Sales.

EXAMPLE · PASTE A SCHEMA

Report for Data Ops: Name, Emp code, Shift, Reports to, Concerned HR, EL balance

Here is the Data Ops report with 74 rows. I mapped "Shift" to shift group and "EL balance" to earned leave left this year.

Fields a report can contain: full name, employee code, email, team, designation, role, reports to (including Chief), concerned HR, shift group, office timings, date of joining, never signed in, leave left, earned leave left, days in attendance this month. Reports return up to 200 rows. Aadhaar, PAN, bank details, salary and passwords are never available.

06 · THE AUDIT TRAIL

Who did what, and when

HR · super admin

EXAMPLE · TRACING A CHANGE

Who changed Rahul Menon's reporting line?

hemang.k@championsmail.com set Rahul Menon to report to Chief on 28 Sep at 5:14 pm.

EXAMPLE · A PERSON'S WEEK

What has priya.hr@... done in the last 7 days?

Priya made 11 entries: 6 leave decisions, 3 password resets and 2 announcements.

Set things for people from Champ HR · super admin

Say whose settings should change and what to. Champ drafts one card per change showing exactly what it will do; you press Apply. The change goes through the same settings screen rules and is recorded in the activity log.

EXAMPLE · CONCERNED HR AND REPORTING LINE

Set Karthik's concerned HR to me and make him report to Vikram

PROPOSED SETTINGS CHANGE

Karthik Reddy

Reports to → Vikram Shetty · Concerned HR → Priya Nair

Apply this change

EXAMPLE · A NAMED ROLE

Give Neha the IT Support role

I have drafted a role change for Neha Joshi: Employee → IT Support (starts as Employee). IT Support can create logins, reset passwords for employees and team leads, and upload biometric reports.

PROPOSED ROLE CHANGE

Neha Joshi

Employee → IT Support

Apply this change

EXAMPLE · A NEW LOGIN

Create a login for Irfan Khan, irfan@championsmail.com, IT Support, day shift, reports to Chief

NEW LOGIN · NOT CREATED YET

Irfan Khan · irfan@championsmail.com

Access: IT Support · Shift group: Day shift · Reports to: Chief

Create login

Be specific. "Give her access" isn't enough. Champ asks which role or privilege and for whom rather than guess, because a wrong guess could hand someone a power they shouldn't have. Always read what a card names before you press Apply.

Hand out a task in one line

team lead · HR · super admin

EXAMPLE · ASSIGNING

Ask Anil to send the dedupe report by tomorrow

TASK · NOT ASSIGNED YET

For Anil Kumar: send the dedupe report

Due Wed 30 Sep

Assign task

EXAMPLE · TWO PEOPLE MATCH, SO CHAMP ASKS

Ask Priya to check the carry-forward sheet

Two people are called Priya: Priya Nair (HR) and Priya Sharma (Data Ops). Which one do you mean?

Everything waiting on you, in one place

everyone

SECTION	WHAT'S IN IT	BUTTONS
Waiting on you	Leave, corrections and comp-off you can decide; tasks given to you	Approve · Reject · Mark done · Can't do this
Raised by you	Tasks you handed out, with their outcome	Withdraw (while open)
Settled recently	Your tasks from the last 14 days	—

"Can't do this" asks what's stopping it, and the person who gave the task sees your reason. Every step is written to the activity log.

@Champ in a conversation everyone

Type `@Champ` or `/champ` in any channel, group or DM. The answer is posted for everyone in that conversation to read, so in chat Champ only uses what is safe to share there: holidays, the leave policy, announcements, and your own records if you ask about yourself. For team, HR or approval questions it points you to 🌟 Champ in the chat sidebar.

EXAMPLE · IN #DATA-OPS

@Champ when is the next holiday?

@Anil Gandhi Jayanthi, Fri 2 Oct.

EXAMPLE · ASKED IN THE OPEN, ANSWERED CAREFULLY

@Champ how many people have no manager?

@Priya Ask me in 🌟 Champ, at the top of the Champ Chat sidebar, for that — it isn't something to answer in a channel.

Champ Chat also has its own slash commands that answer only to you: `/balance`, `/whoisout`, `/leave Fri`, plus `/remind`, `/poll` and `/todo`.

Using Champ well

It never acts by itself

Requests, approvals, tasks, settings, roles and logins are always cards with a button. The portal re-checks your rights when you press it.

Answers come from records only

If nothing matches, Champ says so. Report tables come straight from the database, not typed by the AI.

Text in records is treated as data

If a note or reason looks like an instruction, Champ ignores it and tells you.

No sensitive personal data

Aadhaar, PAN, bank details, salary and passwords are never sent to Champ, so it can't show, guess or leak them.

Scoped to your login

Champ can only use what your role and privileges allow. Every question is logged against your login.

It asks when unsure

An unclear person, role or date gets one short question, not a guess.

INSTEAD OF...	TRY...
"Give Neha access"	"Give neha@... the IT Support role"
"Leave next week"	"Casual leave Mon 5 Oct to Tue 6 Oct, family function"
"Show everything about everyone"	"Report: name, team, shift group, concerned HR, for Data Ops"
"Tell someone to fix Karthik"	"Set Karthik's concerned HR to Priya Nair"
GOOD TO KNOW	
Rows in a report or list	Up to 200
Chat memory	The last 12 messages; press Clear to start over
Longest question	About 4,000 characters, enough for pasted headings
Questions per hour	40 per person
Chat messages are kept	Six months, then deleted
